

Screening for Preeclampsia

Mila Cervar-Zivkovic
2014

Medizinische Universität Graz

1st Trimester-Screening

- early diagnosis of fetal anomalies
- early diagnosis of pregnancy-associated diseases

Mila Cervar-Zivkovic
2014

Medizinische Universität Graz

Multivariable risk algorithm for 1st trimester screening

- IUGR
- early onset preeclampsia
- late onset preeclampsia
- preterm delivery
- fetal anomalies

Mila Cervar-Zivkovic
2014

Multivariable risk algorithm for 1st trimester, cutoffs

Cutoffs

- IUGR 1:150
- early onset preeclampsia 1:200
- fetal chromosomal anomalies 1:300

Detection rate

- IUGR 55%
- early onset preeclampsia 95 %
- fetal chromosomal anomalies 95 %

Maternal data included in multivariable risk algorithm for 1st trimester screening

- chronic hypertension
- history of preeclampsia, IUGR, preterm delivery
- associated diseases (diabetes, immunological, renal, thrombophilia)

Mila Cervar-Zivkovic
2014

Biophysical measurements included in multivariable risk algorithm for 1st trimester

- blood pressure
- Doppler measurements of uterine arteries
- cervical length
- fetal 1st trimester sonography

Mila Cervar-Zivkovic
2014

Medizinische Universität Graz

Screening for Preeclampsia

1st Trimester

Prediction of early onset **pre-eclampsia**,
multivariable risk
algorithm:
maternal factors,
biophysical and
biochemical markers
(PAPP-A, PIGF)

2nd Trimester

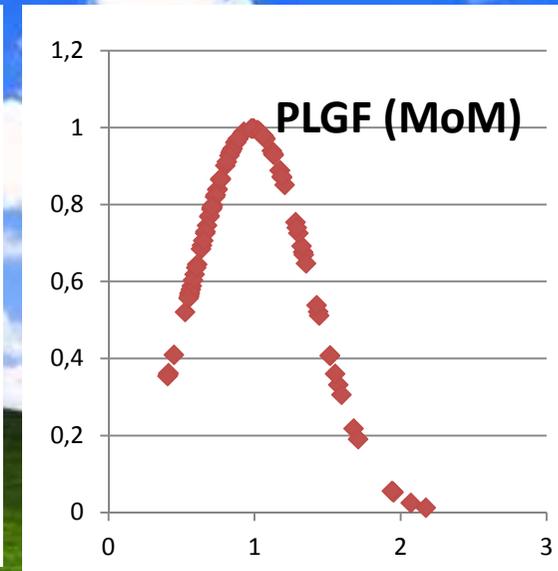

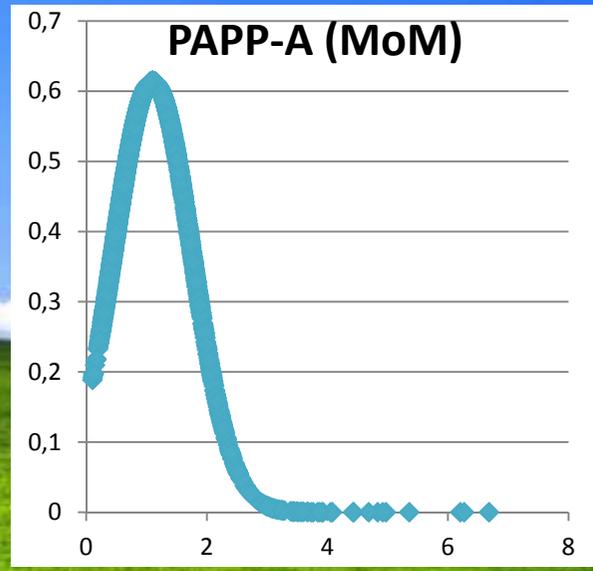

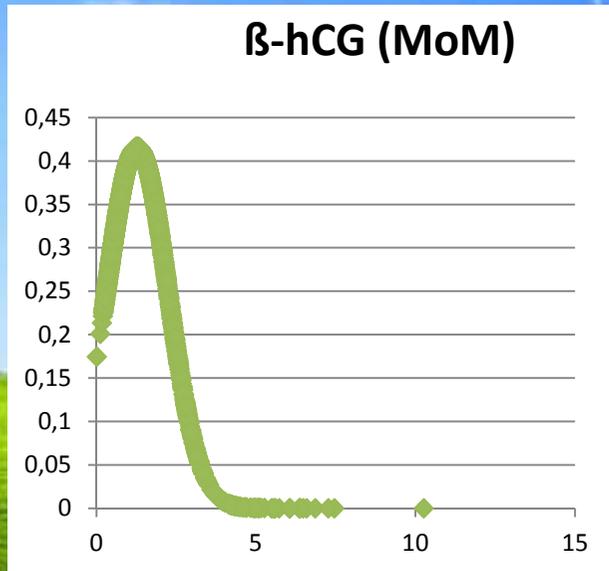

Prediction for **adverse
pregnancy outcome**:
sFlt-1/PIGF, prediction
time 4-5 weeks before
onset of disease

2014

Medizinische Universität Graz

Biochemical parameters included in multivariable risk algorithm for 1st trimester

Mila Cervar-Zivkovic
2014

Medizinische Universität Graz

Ätiologie

early onset

- **< 34. SSW**
- **severe**

late onset

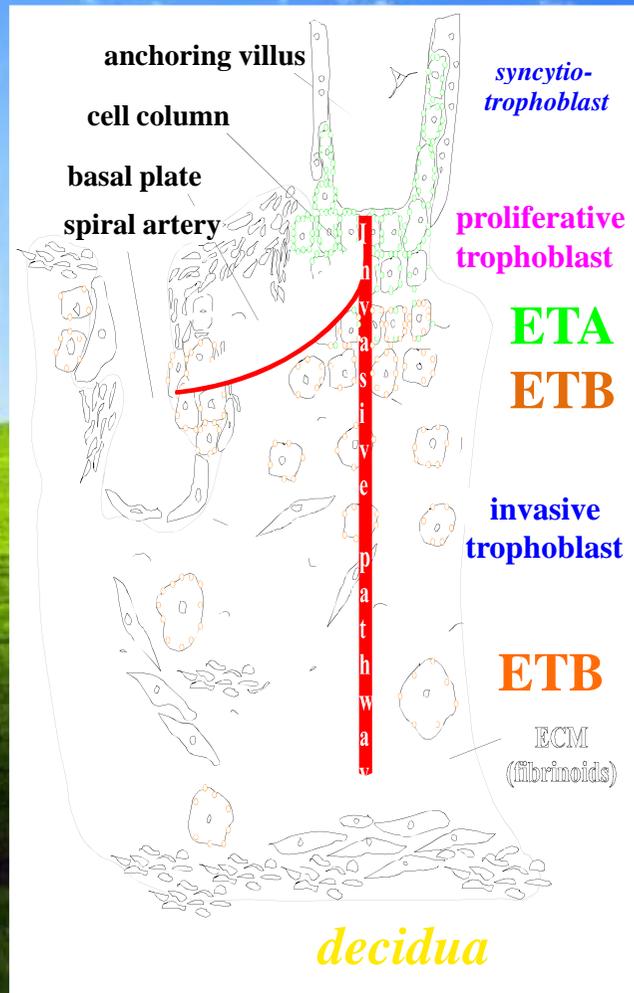

- **> 34. SSW**
- **mild**

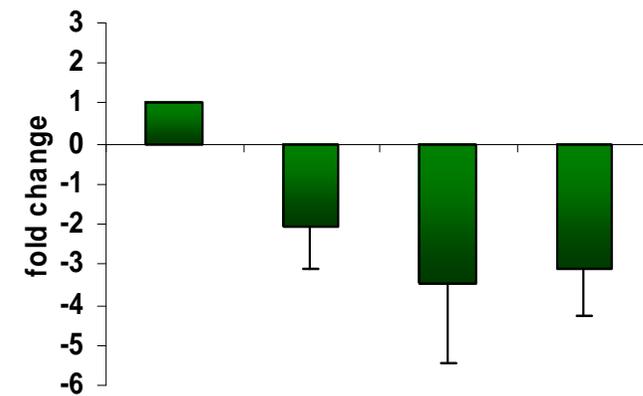

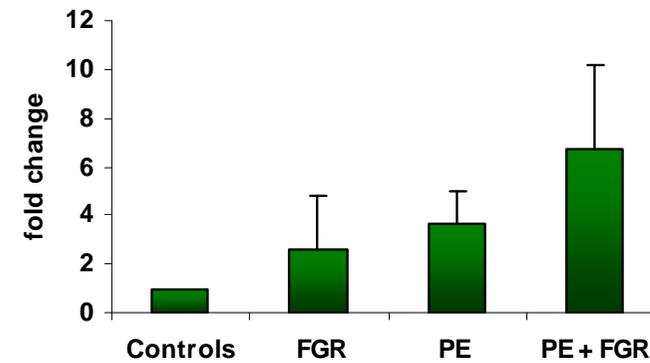

JCEM, Aug. 2011

Life Sci, 2011

ET-1 in 1. Trimester

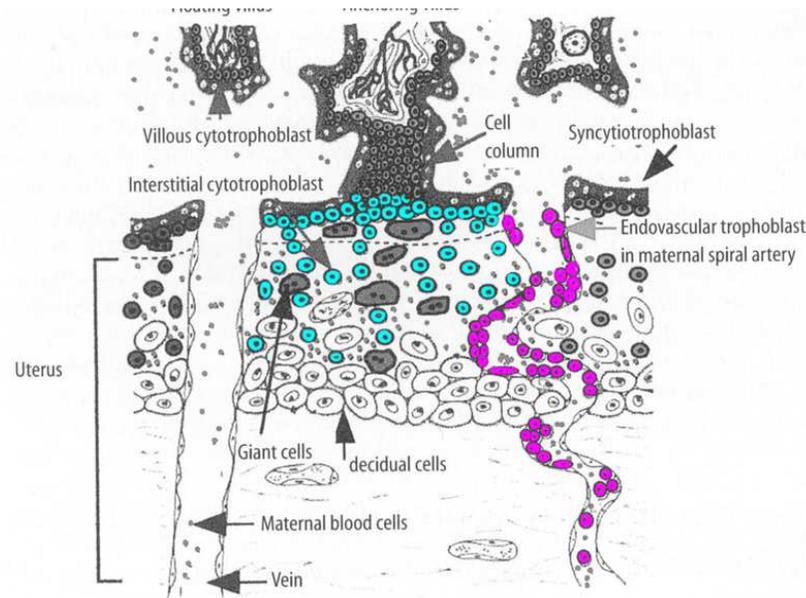

ET-1 in early third trimester placenta

ET-1 in late third trimester placenta

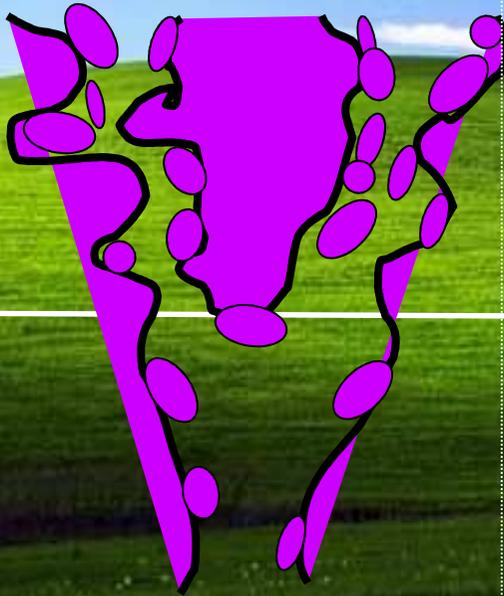

Healthy

**Präeklampsie
IUGR**

Placenta associated adverse pregnancy outcome

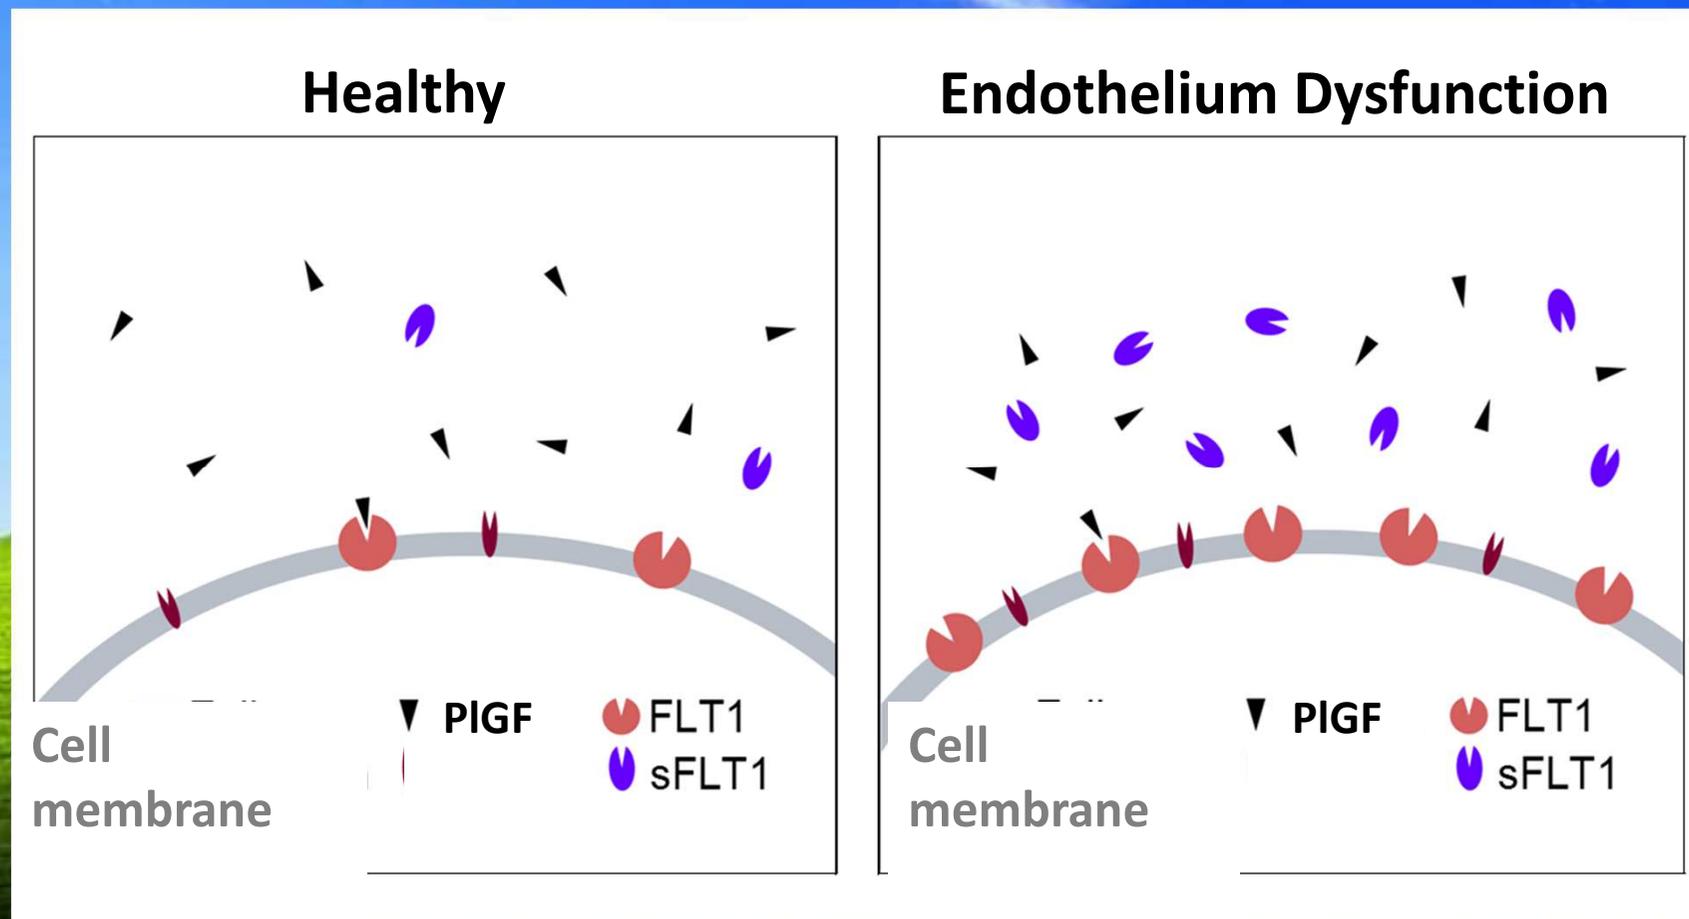

Biomarkers

- PIGF
- sFLT-1

Mila Cervar-Zivkovic
2014

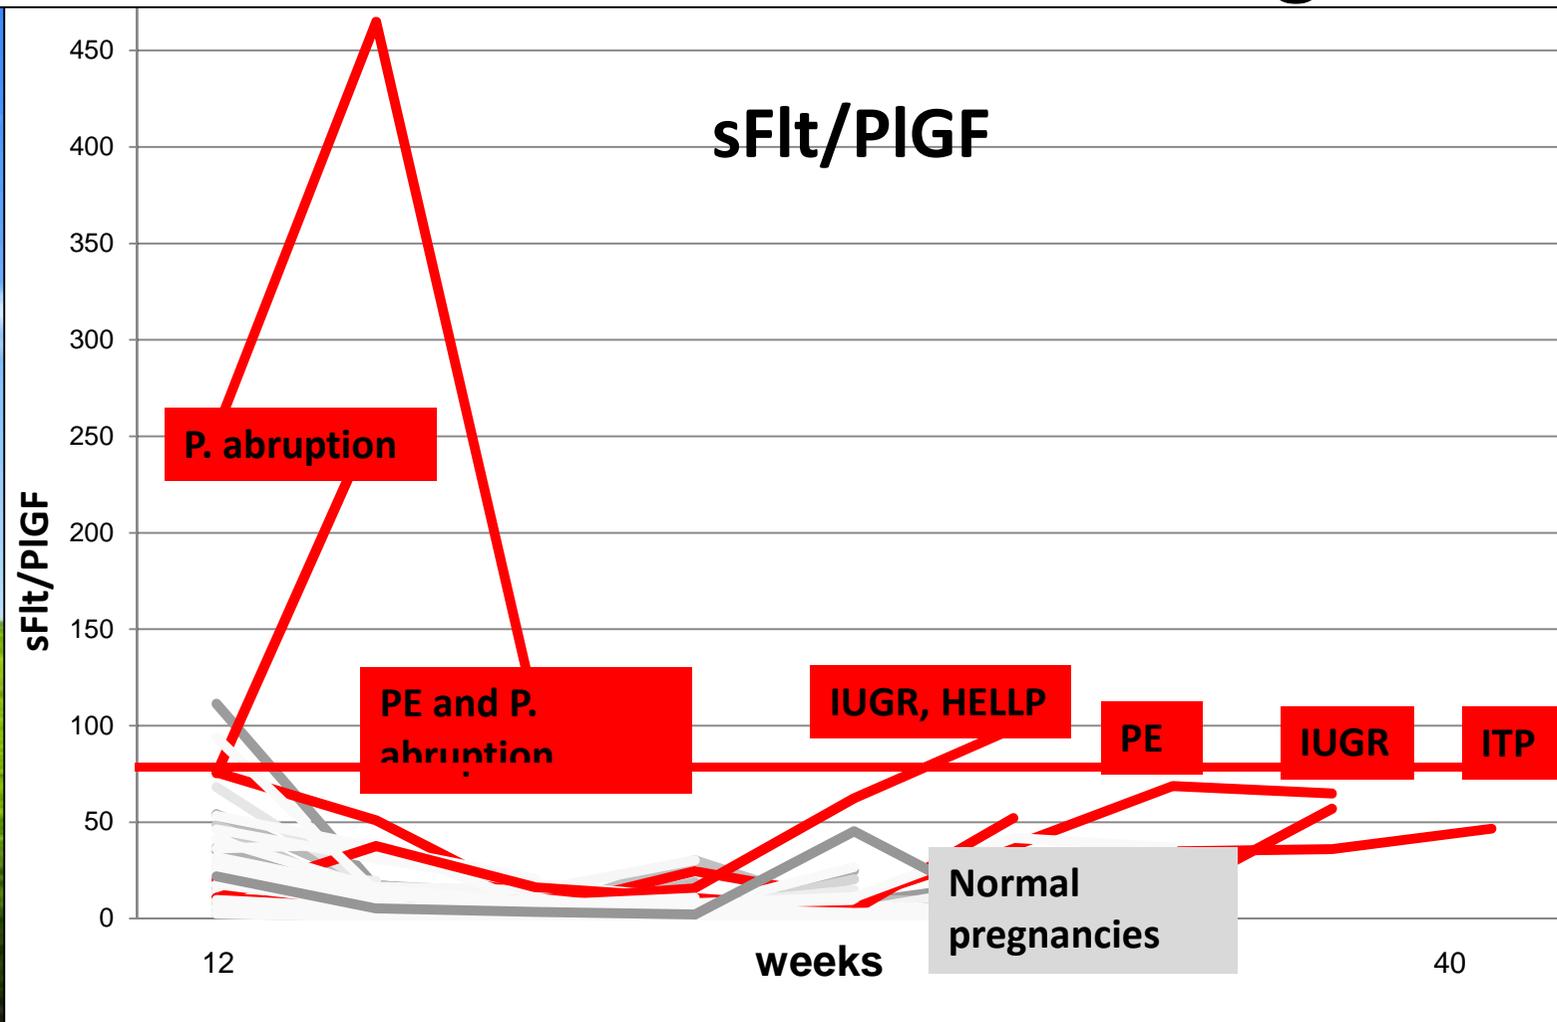

PIGF & sFlt-1

Mila Cervar-Zivkovic
2014

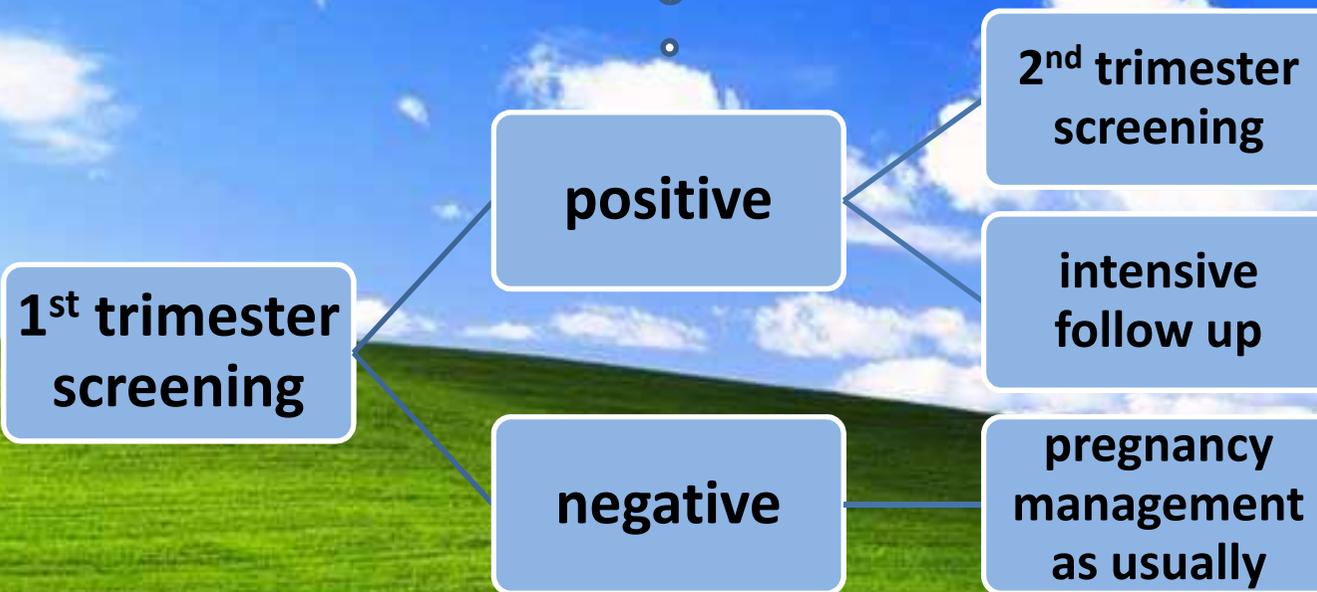

2nd trimester screening

Mila Cervar-Zivkovic
2014

Screening for Preeclampsia

Mila Cervar-Zivkovic
2014

Recommendations for prevention of preeclampsia

- ❖ ASS 75 mg/day
- ❖ diagnostic of associated maternal diseases
- ❖ low fat, high fiber, no salt restriction, vitamins, 1-2 g calcium
- ❖ avoiding of stress, moderate physical activity
- ❖ 2nd trimester screening for preeclampsia and associated maternal diseases
- ❖ thrombophilia: LWMH
- ❖ previous preeclampsia: psychological treatment
- ❖ interdisciplinary for associated diseases
- ❖ all patients: high quality obstetric treatment

Thrombophilia: publications in Pub Med - last 5 years

- Thrombophilia & Fetal Demise: 68
- Thrombophilia & Fetal Growth Restriction: 62
- Thrombophilia & Preeclampsia: 128
- Thrombophilia & Abruptio Placentae: 35
- Thrombophilia & Fetal Loss: 75
- Thrombophilia & Habitual Abortion: 82
- Thrombophilia Screening in Pregnancy: 358
- Thrombophilia and Pregnancy: 696
- Thrombophilia and Pregnancy Complications: 594
- Thrombophilia and Placental Complications: 176

Mila Cervar-Zivkovic
2014

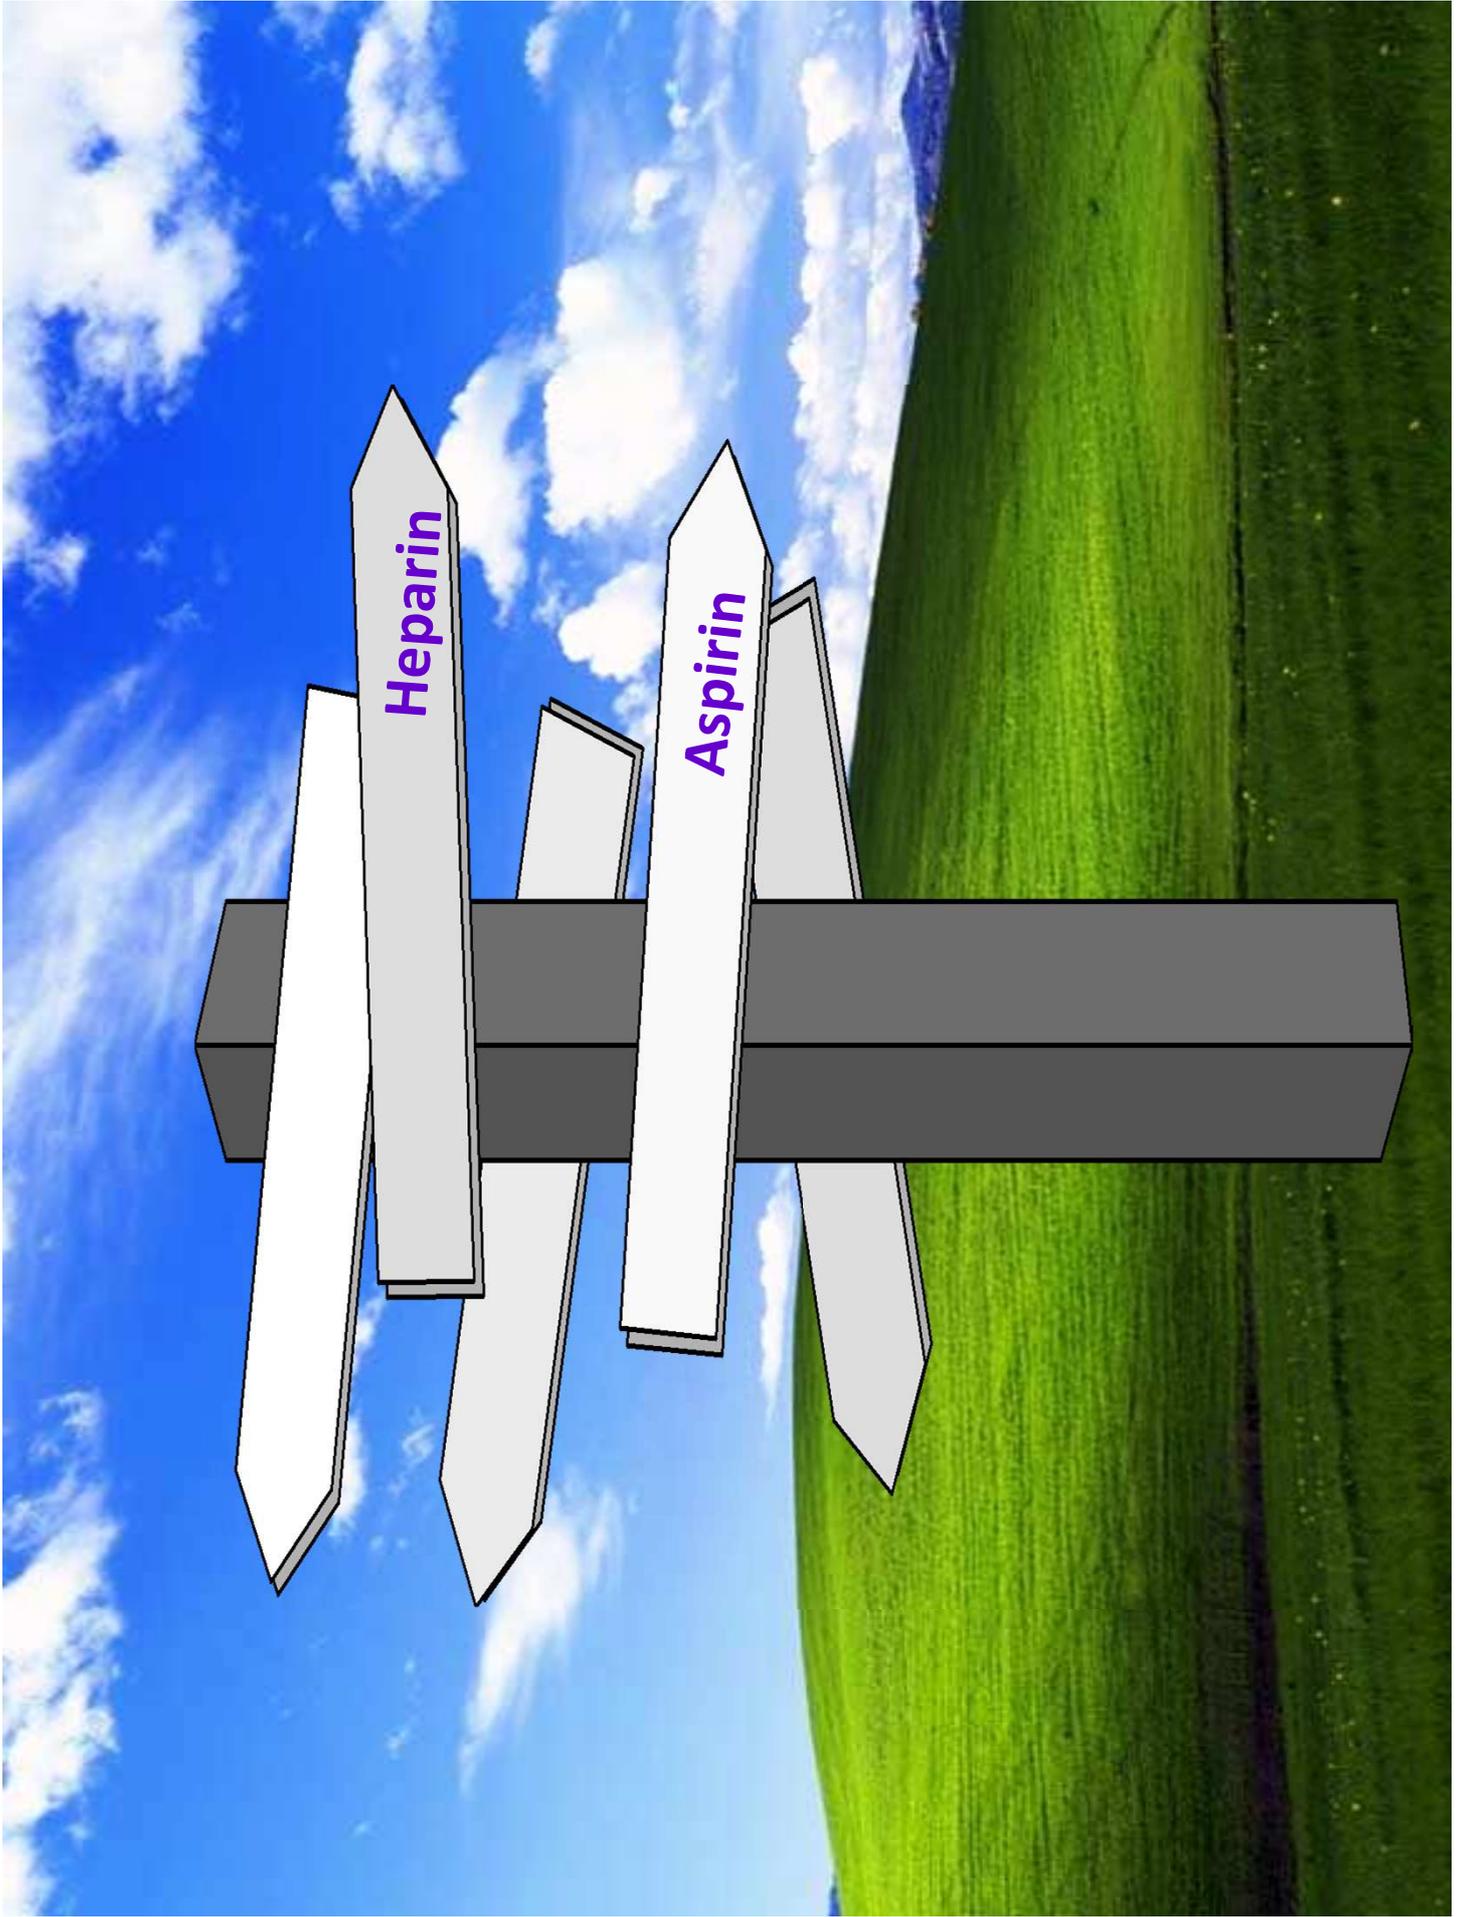

Coagulation and Pregnancy Complications

- **Preeclampsia & APC-R, PS, PC, AT III, Prothrombin**
- **Fetal death & Prothrombin**
- **Habitual abortions & Prothrombin, PAI, Factor V**
- **Placental abruption & elevated Factor VIII activity, APC-R**

2014**

Potential New Biomarkers

- myostatin,
- irisin,
- follistatin,
- cytokeratin 19
- ...

Mila Cervar-Zivkovic
2014

Platelet proteomics - Biomarkers of platelet function

- Established workflow for proteome analysis of patient-specific platelet samples
- High-resolution LC-MS/MS
- Cost-effective semiquantitative analysis using dimethyl labeling
- Enrichment of platelet membrane proteins, when feasible
- Enrichment and network analysis of over- and underexpressed proteins
- Western blot analysis of platelet receptor levels.
- Correlation with platelet function testing

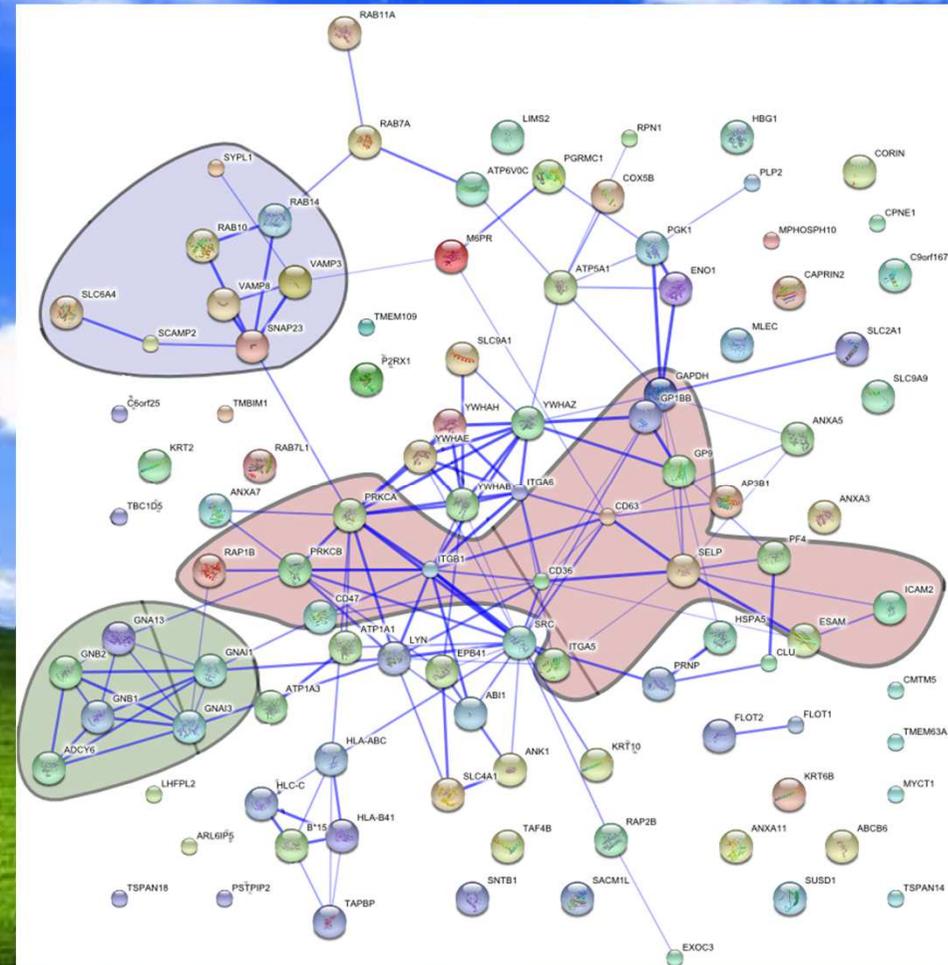

Figure: Network analysis of overexpressed proteins
